

LIFE LIKE FOILS

SETTING NEW STANDARDS IN EXTERIOR FOILS

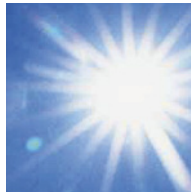

'LIFE LIKE' Woodgrain foils from Skai Covertech by Hornschuch are quite simply more life like in their appearance and texture. The COOL COLOR® range of foils are only available for door panel manufacture exclusively from 3D Laminates!

INNOVATION

This innovative foil is ideal for all external upvc surfaces including; windows, roofline components and doors. The unique finely structured textured effect makes 'LIFE LIKE' window and door installations much more real in their feel and appearance.

These new foils have revolutionised the window market in Europe since its launch in 2004.

PERFORMANCE

With these new designs coupled with performance properties that will ensure a lasting durability, 'LIFE LIKE' is setting new standards in appearance, texture and feel.

'LIFE LIKE' surface fulfil the RAL-S test requirements for hot climates. Independent testing and in-house testing under the harshest of test regimes confirm that 'LIFE LIKE' foils retain their colour and form permanently, giving the benefit of a long lasting 'as new' window and door installation.

An important advantage of the 'LIFE LIKE' surface is thanks to the open pore fine structure making the surface much more easier to clean than conventional foil surfaces.

COMPATIBILITY

The comprehensive 'LIFE LIKE' range is available for any combination of window and conservatory system, door fabrication as well as roof line systems including matching mouldings, trims and joints all of which can be made available through 3D Laminates Ltd.
